

Palmer Diaphragm Seals are Now Available!

Protect your gauges from high temperatures, corrosive liquids, and fluids with the potential to clog with new Palmer Diaphragm Seals.

Palmer diaphragm seals are available in stainless steel and a variety of exotic metals, in both on-line and off-line designs. Threaded, flush, flange, saddle, in-line, and wedge designs are available, as well as specialty models for the pulp & paper and sanitary processing industries, including Tri-Clamp® and Cherry Burrell® “I” Line styles.

Our diaphragm seals are interchangeable with most seal brands. Choose each feature of the diaphragm seal appropriate for your process to create a custom design for your application. Made in the USA for faster delivery.

Match a [Palmer Pressure Gauge](#) with a [Palmer Diaphragm Seal](#) for a complete sealed system; system NIST calibration is available.
