BEYOND THE SCALE

Now Offering Differential Pressure Palmer Chart Recorders

Palmer 524 Series Fully [Mechanical Differential Chart Recorders](#) are now available. Add additional pressure and temperature systems to monitor all of your process variables in one place.

Designed primarily for use in the oil and gas industry, differential pressure recorders are also ideal for monitoring filtration, liquid levels, and flow.

Housed in a rugged 12 inch cast aluminum case with corrosion prevention and powder coatings, these recorders are long-lasting and designed to take a beating. [Differential pressure models](#) are available in ranges of 20 to 400 inches of water, with pipestand mount configurations only.

Featuring an edge welded rupture proof bellows for up to 30% added lifespan, the fully mechanical differential pressure cell with dual bellows design requires no power, and is made of 316L SS.

Add up to three additional pressure or temperature systems for measuring pressures up to 10,000 PSI and temperatures up to 600°F. Capture all the relevant information for your installation in one place. Connect the recorder to your system using our five valve manifold kit, available as an accessory.

[Palmer 524 Series Differential Chart recorders](#) use a 9-7/16" arc line for compatibility with other famous maker charts.

For [Extended Warranty](#) coverage, purchase NIST calibration with your new unit, and return to factory for annual NIST re-certifications to extend the warranty to up to ten years!
