

NEW! Benchtop Calibrators Now Available

Three new models now available from our business partner AOIP: the **Calys Series**: multi-function calibrators for temperature, pressure, resistance, current, voltage, and frequency in one single instrument. Perfect for the lab!

Calys 1000

Table documented multi-function bench calibrator can simultaneously measure, generate and record over two isolated channels various signals of temperature, pressure, resistance, current, voltage, and frequency in one single instrument.

Calys 1200

Precision documented multi-function bench calibrator. Features temperature simulation, scaling, steps, synthesizer, statistical functions, and user-programmable configurations.

[View Full Specifications](#)

Calys 1500

Documenting laboratory multi-function calibrator. Works as a simulator (IN/OUT), with dual channel thermometer (IN/IN) to perform comparison calibration. Calibrates HART transmitters and thermistors. Features temperature simulation, scaling, steps, synthesizer, statistical functions, and audit trails.
